

AI*IA 2017

16th International Conference of the Italian Association for Artificial Intelligence
Bari, November 14-17, 2017

MAIN TRACK: SESSION 2

Thursday Nov. 16, 2017 (from 09.00 to 09.30)

1. Cinzia Marte
Geometric and semantic aspects for the document layout analysis
2. Enrico Mensa
VP-Explore: Verbal Phrase semantically explained
3. Hossein Mohammadhassanzadeh
Investigating a Plausible Reasoning Approach for Performing Semantics-based Health Data Analytics
4. Lucas Rizzo
On Demonstrating the Impact of Defeasible Reasoning via a multi-layer Argument-based Framework
5. Manuel Striani
A framework for multi-level semantic trace abstraction
6. Alessandro Suglia
Empowering Conversational Agents with Situated Natural Language Communication Skills by Exploiting Deep Reinforcement Learning techniques
7. Stefano Tedeschi
An accountability-driven organization programming technique
8. Jessica Zangari
Design and Implementation of the I-DLV Grounder: Optimizations, Customizability and Interoperability
